OVERVIEW

- An advanced program built upon the foundations of Level 4 in Information Technology and Cyber Security, designed to equip learners with strong skills in network defense, data protection, ethical hacking, and risk management.
- It also prepares them to pursue higher education or take on mid-level professional roles in cyber security analysis, systems protection, and IT security management across various sectors.

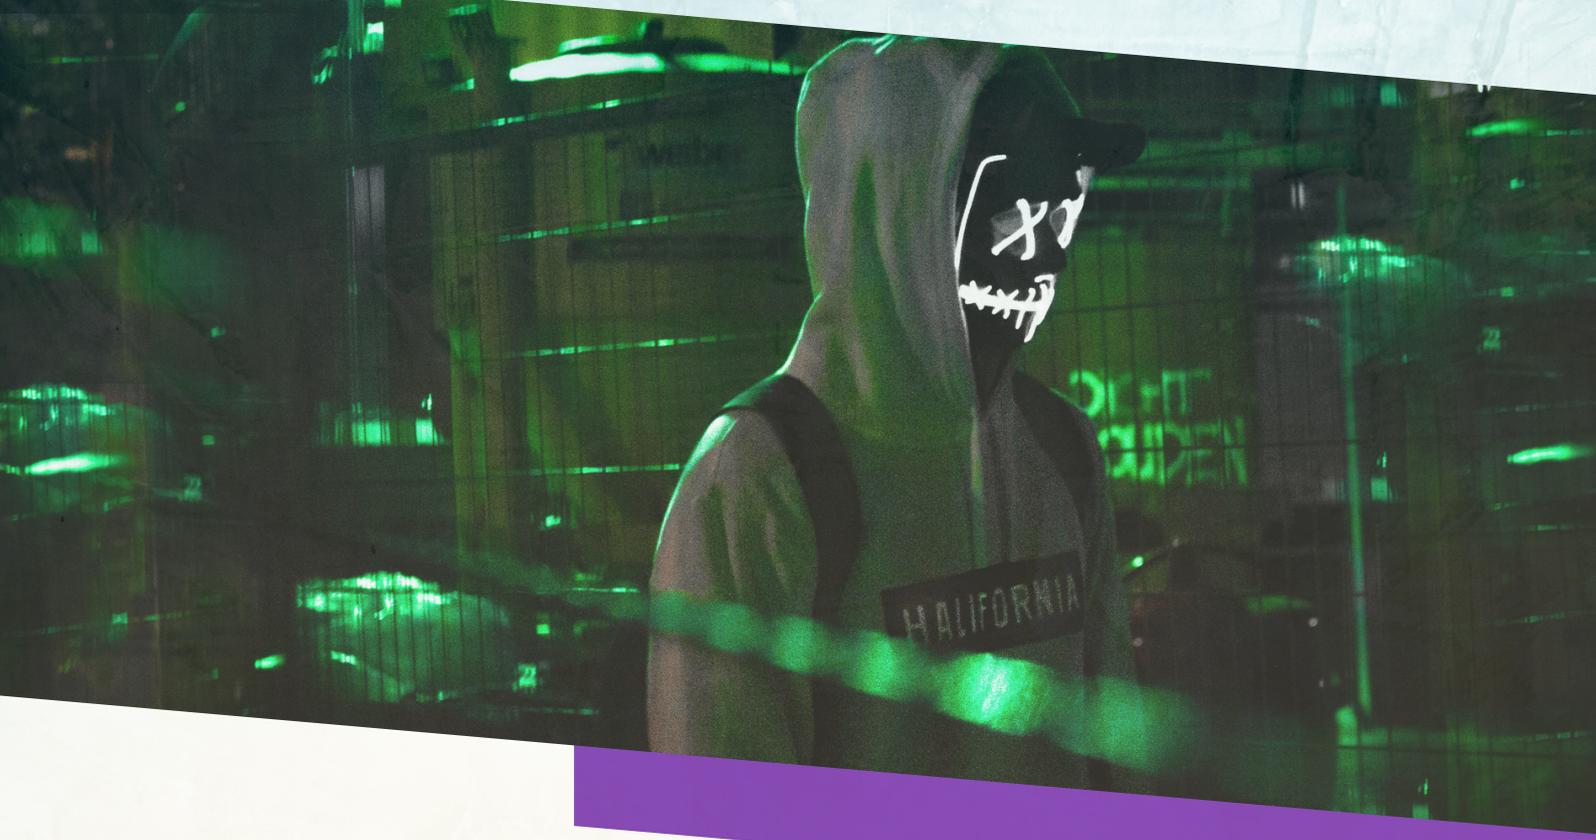

AIM

To provide learners with the essential knowledge and practical skills in cyber security, enabling them to build a strong academic and professional foundation that prepares them to pursue university studies or enter the job market with confidence, technical expertise, and professionalism.

OBJECTIVES

- Understanding the fundamental principles of cyber security and its critical role in protecting digital systems and information assets.
- Comprehending the core aspects of information security management, including planning, implementing, monitoring, and controlling security measures within organizations.
- Acquiring practical skills in network security, ethical hacking, data protection, and vulnerability assessment.
- Developing the ability to identify, analyze, and mitigate cyber threats and risks effectively.
- Gaining knowledge of security policies, compliance standards, and incident response procedures.
- Enhancing academic research, technical documentation, and analytical reporting skills related to cyber security practices.
- Building a strong foundation that supports progression to higher academic levels in computing, networking, and information security.

الوحدات الدراسية الأساسية:

CORE STUDY UNITS:

- Information Technology Security (20 credits)
- Principles of Computer Science (20 credits)
- Algorithms and Data Structures (20 credits)
- Computer Networks (20 credits)
- Mathematics for Computer Science (20 credits)
- Operating Systems (20 credits)

FEES:

- Affordable and flexible payment options available.
- Installment plans are offered.
- Please contact us via email or WhatsApp to receive detailed information about the tuition fees and installment plans.

DURATION AND LEARNING MODE:

- Duration: 8 months
- Mode of Study:
 1. Fully online
 2. On-campus
 3. Blended mode (combining in-person and online sessions)

ADMISSION REQUIREMENTS:

- Applicants must be 18 years old or above.
- Possess a Level Diploma or an equivalent qualification.
- The program is delivered in English; an assessment and specialized language support courses will be provided for those who need to improve their English proficiency.

PROGRESSION PATHWAYS:

ACADEMIC PATHWAY:

Graduates can progress to the final (third) year of a Bachelor's degree in Cyber Security or related disciplines, either:

- Online, or
- On-campus at British universities in the UK.

Earning this qualification enables students to apply for a study visa and complete their degree in the United Kingdom.

All arrangements are facilitated through the Academy for eLearning.

PROFESSIONAL PATHWAY:

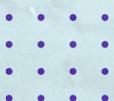

Graduates will be prepared for supervisory and administrative positions in various fields such as Human Resources, Marketing, Supply Chain Management, Management Consulting, and Operations Management.

ACCREDITATION AND CERTIFICATION:

Upon successful completion of the program, graduates will receive:

- A British Higher National Diploma (HND) issued by the British Academy for eLearning, certified in the UK and internationally recognized.

This provides graduates enhancing their academic and professional opportunities both locally and globally.
